# DUTCH IRIS

AT LESS THAN 2¢ EACH IN QUANTITIES OVER 250

Because we believe that Dutch Iris offer you more beauty for less investment in time and money than any other bulb which is planted in the fall, we are discontinuing handling other bulbs and we are concentrating on bringing you the widest possible assortment of Dutch Iris. All of our Dutch Iris are unconditionally guaranteed to bloom this spring. This guarantee is made regardless of planting condition and care. However to achieve top quality blooms we recommend that the bulbs be planted where they get from 50% to full sun and that the ground be cultivated to a depth of 8 inches prior to planting. If your soil is infertile, a light application of any well balanced fertilizer will be beneficial and if your soil is fertile an application of bone meal will improve the quality of the bloom.

For maximum effect Dutch Iris should be used in mass. If planted in a bed they should be planted about 4 inches apart each way. At this spacing a bag of 36 bulbs will plant 4 square feet of bed space. If used in a border, plant a triple row with bulbs about 2 inches apart each way. At this spacing a bag of 36 will plant 2 feet of row.

All bulbs will be packed 36 to the bag, except Golden Harvest which will be packed 30 to the bag. The following varieties will be available:

- \_\_\_\_\_ IMPERATOR—The best dark blue, large bloom, strong heavy stem.
- \_\_\_\_\_ VAN VLIET—One shade lighter than Imperator, large bloom, strong grower.
- \_\_\_\_\_ SAXE BLUE—A sky blue, medium grower with medium size bloom.
